

# Alternative Components

## Scope of: Quality Management System

Production manufacturing of tubing, wire and cnc machining of other components for medical, industrial, automotive and marine industries.

The scope and intent of our Quality Management System is to define and communicate our commitment to continually enhance customer satisfaction through:

- effective process improvements to all systems of our business;
- to assure conformity to our customers and applicable legal requirements;
- provide policies, procedures developed and implemented with the primary focus to assure the continual conformity with the requirements of the International Standard ISO9001:2015 (E)

### Not Applicable to our Quality Management System:

(8.3) Design and Development of Products and Services.

(8.5.5) Post-Delivery Activities.

**Justification:** Alternative Components does not perform design and post-delivery activities therefore the fulfillment to the requirements of these clauses are not applicable to our Quality Management System. Alternative Components verifies the output of our customers design through measurements, fixture checks, visual inspection to the customer specification and drawings, and due to the nature of our business post-delivery activities are not needed to achieve product conformity and or customer satisfaction.
